CONTENTS

Special issue on Magnetism

Foreword

Neutron diffraction and optical studies of the ionic ferromagnet Rb_2CrCl_4 doped with Mg^{2+}, V^{2+} and Fe^{2+} *P J Fyne, M T Hutchings and P Day* 1–12

EPR as a necessary complement of magnetic measurements in exchange coupled systems *Alessandro Bencini, Cristiano Benelli, Dante Gatteschi and Claudia Zanchini* 13–22

Magnetic properties and molecular structure of cobalt(II) oxydiacetate trihydrate *William E Hatfield, Jeffrey H Helms, Brain R Rohrs, Phirtu Singh, John R Wasson and Robert R Weller* 23–31

Irregular spin state structures in heteropolymetallic systems *Oliver Kahn* 33–51

Low temperature high field magnetisation studies on metalloporphyrins *Samaresh Mitra* 53–68

Spin glass behaviour in some ternary metal chalcogens *Charles J O'Connor, Jonathan W Foise and Robert C Haushalter* 69–78

Magnetochemistry of copper(II) *Richard L Carlin and Ruud Block* 79–97

Structural and electronic properties of six-coordinate Lewis-base adducts of iron(III) Schiff-base complexes. Crystal structure and magnetism of the high spin complex [(imidazole)Fe(salen)(NCS)]-0.5 MeOH and of a related complex containing two dissimilar axial ligands *Brendan J Kennedy, Keith S Murray, Peter R Zwack, Ernst Horn, Michael R Snow and Edward R T Tiekink* 99–114

Magnetic properties of some exchange coupled $[Ni(mnt)_2]^-$ dimers *P Kuppuswamy and P T Manoharan* 115–129

Recent progress in experimental one-dimensional magnetism *J P Renard, S Clement and M Verdaguer* 131–146

Magnetic properties of $A_2Cu_nX_{2n+2}^{2-}$ systems
Roger Willet, Todd Grigereit, Kris Halvorson and Brian Scott 147–160

Inorganic and Analytical

Lanthanide perchlorate complexes of 2-acetamidopyridine-1-oxide
N S Navaneetham, R Kalyanasundaram, N Rajasekar and S Soundararajan 161–164

Solvent extraction of metals using LIX26 extractant
G N Rao and V Ramesh 165–169

Quantitative estimation of substances spotted on filter paper by photo-acoustic spectroscopy *T Somasundaram, Sanjay S R Rao and P Ganguly* 171–176

Preconcentration of iodide from saline water samples and determination by the catalytic method *K R Krishnamoorthy and R K Iyer* 177–183

Synthesis, characterisation and chemical reactivity of some new dioxo-uranium(VI) complexes of 2-aminobenzoylhydrazone of butane-2,3-dione *Saktiprosad Ghosh and Amalendu Maiti* 185–192

Copper(II), nickel(II), palladium(II) and iron(III) complexes of 2-(3-phthalhydrazidylazo)-1,3-diketones *K Krishnankutty and N Thankarajan* 193–197

Synthesis and spectroscopic studies of platinum(II) and palladium(II) complexes with amino acids and polypyridyl ligands
V N Joshi and A S Gijare 241–248

Potassium ferrocyanide as an analytical reagent for the determination of rhenium *V Yathirajam, Sirpal Khaira and L R Kakkar* 249–254

Kinetics and mechanism of anation of hydroxopentaaquo chromium(III) ion by L-histidine in water ethanol mixtures of different dielectric constant *H G Mitra Mustofy and G S De* 255–264

Synthesis and characterization of adducts of stannous chloride with Schiff bases *Anil Varshney and J P Tandon* 265–268

Ligand based redox series. Comments on its pattern and search for a parallel proton transfer series *Dipankar Datta* 269–272

Some trivalent lanthanide complexes of l-tyrosine hydrazide
T R Rao and I A Khan 273–278

Oxidation-reduction electron transfer of tetra-sulphonated phthalocyanin cobalt(II)-apomyoglobin and tetra sulphonated phthalocyanin iron(II)-apomyoglobin *Suresh C Tyagi* 279–288

Interaction of metal ions with cytidine and amino carboxylic acids
P Rabindra Reddy and K Sudhakar 289–296

Organic

Kinetic model for micellar catalysed hydrolysis of esters-biomolecular reactions *P S Raghavan and Vangalur S Srinivasan* 199–206

Substituent effects on carbon-13 NMR chemical shifts of side chain carbonyl carbons of 4-substituted 1-naphthamides
K Rajasekaran, D Gnanasekaran and T C W 207–212

Kinetics of oxidation of ethylenediamine tetraacetic acid by aromatic N-bromamines in buffer medium
K Mohan, S Ananda and D S Mahadevappa 213–220

Electrochemical reduction of diazepam
L Thomas, J L Vilchez, G Grovetto and J Thomas 221–228

Reactions of dialkoxynaphthalenes with cyclic α, β-unsaturated acids
J R Merchant and V C Waghulde 297–304

Physical and Theoretical

Crystal structure of benzocaine—a local anaesthetic
B K Sinha and Vasantha Pattabhi 229–234

Experiments with flowing gases in an open photoacoustic cell
P Ganguly and T Somasundaram 305–310

Electrochemical phase formation studies of mercury on glassy carbon
S Jaya, T Prasada Rao and G Prabhakara Rao 311–318

Volume change on mixing: Binary mixtures of isomeric butylamines with chloroform *Gopal Pathak, K R Patil and S D Pradhan* 319–322

A multistage adsorption process in 15–15′ *cis* β-carotene crystal: Electrical conductivity enhancement on chemical vapour adsorption
Bani Mitra and T N Misra 323–332

A new B-Z oscillatory reaction with mixed organic substrates
M K Ram Reddy, K C Rajanna and P K Saiprakash 333–340

Rapid Communication

The role of solvent models in stabilizing nonclassical ions
C Satheesan Babu and Bhalachandra L Tembe 235–240

Special issue on hydrophobic effect

Foreword 341–342

Organizational consequences of the hydrophobic interaction
Charles Tanford 343–356

On the role of water in molecular recognition and self-assembly
A Ben-Naim 357–377

The hydrophobic interaction between macroscopic surfaces
Hugo K Christenson, Per M Claesson and Richard M Pashley 379–389

Photoreactions in hydrophobic pockets
S Devanathan, M S Syamala and V Ramamoorthy 391–407

The effect of hydrophobic-lipophilic interaction on chemical reactivity. 9. Putting the spotlight on lipophilic forces in solvent-effect studies
Xi-Kui Jiang, Xing-Ya Li and Bang-Zhou Huang 409–421

The effect of hydrophobic-lipophilic interactions on chemical reactivity. 10. The competition between the aggregation of long-chain esters and the formation of inclusion complexes of these esters with amylose
Xi-Kui Jiang, Xing-Ya Li and Bang-Zhou Huang 423–434

Association models for alcohol-water mixtures
A H Roux and J E Desnoyers 435–451

Solubilization of bilirubin by cholate micelles. Spectroscopic and gel permeation studies *Kasturi Lahiri Puranam and P Balaram* 453–468

Microenvironmental differences amongst micelles of various shapes and structures *J Shobha and D Balasubramanian* 469–478

Role of the hydrophobic region of signal sequences in the targeting of proteins to membranes and translocation across the hydrophobic membrane barrier *R Nagaraj* 479–485

Subject Index 487–493

Author Index 494–496
